Summary

Full-stack web developer experienced in building and deploying production-ready applications using React.js, Node.js/Express.js, and MongoDB. Skilled in developing secure, scalable RESTful APIs, integrating payment gateways, and delivering responsive frontend interfaces. Passionate about solving real-world problems through clean code, efficient architecture, and modern development practices. Experienced in leveraging AI tools such as GitHub Copilot, ChatGPT, Claude, and Gemini to accelerate development, enhance problem-solving, and build smarter solutions.

Education

B.M.S. College of Engineering

B.Tech in Electronics and Instrumentation Engineering

Sep. 2022 – May 2026

Bangalore, Karnataka

Experience

GeeksforGeeks Live Demo

Intern

Apr. 2025 – Jun. 2025

Bangalore, Karnataka

- Developed a full-stack hotel booking web application similar to Airbnb, enabling users to browse, book, and pay securely using Razorpay.
- Built backend using **RestAPI** and **Node.js/Express.js** with multiple RESTful APIs for user management, hotel listings, and bookings.
- Integrated **MongoDB** via **Mongoose** for dynamic data storage and implemented secure authentication using **JWT**.
- Developed a responsive frontend with **React.js**, including home, hotel listings, single-hotel details, and order confirmation pages.
- Used **Axios** for API communication between frontend and backend, managing data fetching and user interactions efficiently.
- Integrated **Razorpay** for real-time payments and deployed backend on **Render** and frontend on **Vercel** to deliver a production-ready application.

Projects

YouTube-Style Video Platform | *Next.js, TypeScript, Firebase, Firestore, GCS, Cloud Run, Docker, FFmpeg* **2025**

- Built a full-stack video platform with Next.js and Firebase Auth, enabling secure uploads and public video streaming.
- Designed a cloud pipeline where raw uploads trigger Pub/Sub to run a Dockerized FFmpeg service on Cloud Run for transcoding.
- Implemented signed-URL uploads, Firestore metadata storage, and an end-to-end workflow for processing and serving videos from GCS.
- Containerized services with Docker, deployed via Artifact Registry and Cloud Run, and used Firebase Functions for backend APIs.

Food Delivery Web App | *React.js, Node.js, Express.js, MongoDB, Axios*

Feb. 2025

- Developed a full-stack food delivery app with user authentication, restaurant listings, and order placement.
- Built backend REST APIs using Node.js/Express.js and integrated **MongoDB** with Mongoose for data management.
- Created a responsive React frontend and used Axios for smooth communication with backend services.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python

Frontend: React.js, HTML5, CSS3, Tailwind CSS

Backend: Node.js, Express.js, RESTful APIs, MongoDB

Cloud, DevOps: Docker, Google Cloud Platform (GCP)

AI Tools: GitHub Copilot, ChatGPT, Claude, Prompt Engineering for Code Generation, AI-assisted Debugging

Tools & Platforms: Git, GitHub, VS Code, Postman, Render, Vercel

Leadership / Extracurricular

National Badminton Player

2020 – 2025

Sports Achievements

School of India / BMSCE

- Achieved State Rank 5 in U-17 Badminton and represented college in multiple tournaments and South Zone competitions.
- Served as School Sports Captain twice (10th and 12th grade), leading teams in inter-school competitions and promoting teamwork.
- Hobbies: Chess, Basketball, Football.
